

VSee Video Telemedicine

Telemedicine Kit

Choose the easiest telemedicine kit for remote consultations. You can find VSee kits on board Shell's oil platforms off the coast of Nigeria and Alaska, and in refugee camps in Iraqi Kurdistan.

Telemedicine Kit Components

Telemedicine Cart

This solution is simple, flexible, and requires almost no training. Carts include an all-in-one PC, remote-control PTZ camera, and optional devices like a digital stethoscope, otoscope, and dermascope for real-time device streaming.

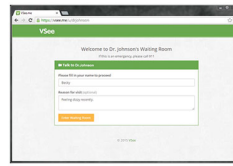

Mobile Telemedicine Kit

This ultralight telemedicine kit uses iPhone clip-ons and is easy to carry. It's perfect for travelling nurses and home care patients.

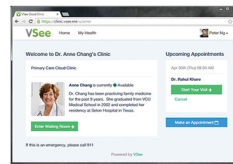

Virtual Waiting Room

Add a waiting room to your website and start offering telemedicine today. Patients can see you from their home or from a remote clinic with a single click and no sign-up.

- HIPAA-compliant video calls, document sharing, and web chat
- Online waiting room with multiple provider login
- Mobile notification when client enters waiting room
- Shared waiting queue for concurrent video visits
- Custom URL

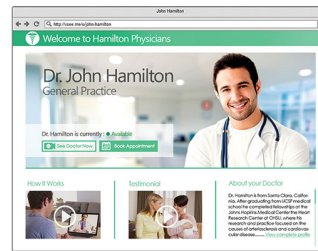

Cloud Clinic

Cloud Clinic is the all-in-one suite that includes patient scheduling, ePay, private waiting queue, and visit notes so you can easily manage your online practice.

- HIPAA-compliant video calls, document sharing, and web chat
- Online waiting room with multiple provider login
- Mobile notification when patients walk in
- Email notification and reminders for appointments & walk-ins
- Web-based scheduling
- Visit notes
- Online payment

eVisit Platform and API

Choose the eVisit platform to create your custom web services and mobile apps. eVisit has a simple encrypted API for embedding into third-party applications. Hire VSee's professional services team to design and implement your application.

eVisit Platform Features

HIPAA P2P Video Chat	Patient Web Portal	Provider Dashboard
One-click Video Call	Intake Form / PHR	Calendar
