Urgent Care, Retail Clinics, Specialist Consults

Join VSee clients Partners, OneMedical, and others in growing your business through telehealth. VSee solutions make it simple for urgent care centers and retail clinics to launch telehealth services fast and then scale up as needed.

Start with **VSee Messenger** for remote doctor consultations — the simplest way to see faces and live-stream medical device images at the same time. With VSee, this can be done on a regular laptop. Just download the app, plug in the device, and your doctors can start examining patients virtually.

Add a **VSee Clinic -Triage Waiting Room** to manage your patient walk-ins. Patients can sign into the waiting room queue without registration. Multiple providers can login, making it ideal for triage and specialist consults.

VSee Messenger

- Stream digital medical peripherals
- Far-end PTZ camera control

VSee Clinic - Triage Waiting Room

- Manage walk-in patient visits

Chronic, Post-Acute Care, Wellness Management

New technology is making it easy to keep tabs on patients no matter where they are so you can prevent unnecessary hospital visits and re-admissions.

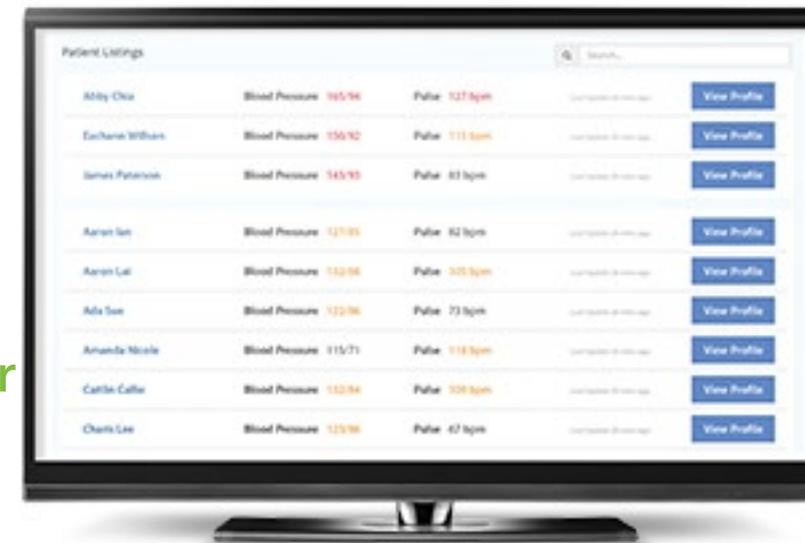

The **VSee Clinic - Health Manager** dashboard lets you easily track patients' real-time biometric data and to get alerts. Patients in different notification levels are automatically grouped by color for fast scanning. You can also customize the views and visualizations of an individual patient's vitals and other health data.

Patients can auto-upload data from digital health devices (e.g. blood pressure cuff, glucose meter, FitBit, iHealth, etc.) to the **VSee Clinic - Health Manager** patient portal for tracking. Portals may be customized to include data sets such as food diaries, mood logs, medication check-off, vital signs, and more!

VSee Clinic - Health Manager

- Health manager data dashboard
- Patient portal with wellness device upload
- Customizable intake, device integration, and features

Hospital Telemedicine

Tele-NICU, Telestroke, Teledermatology, ER/Trauma, Specialist Consults

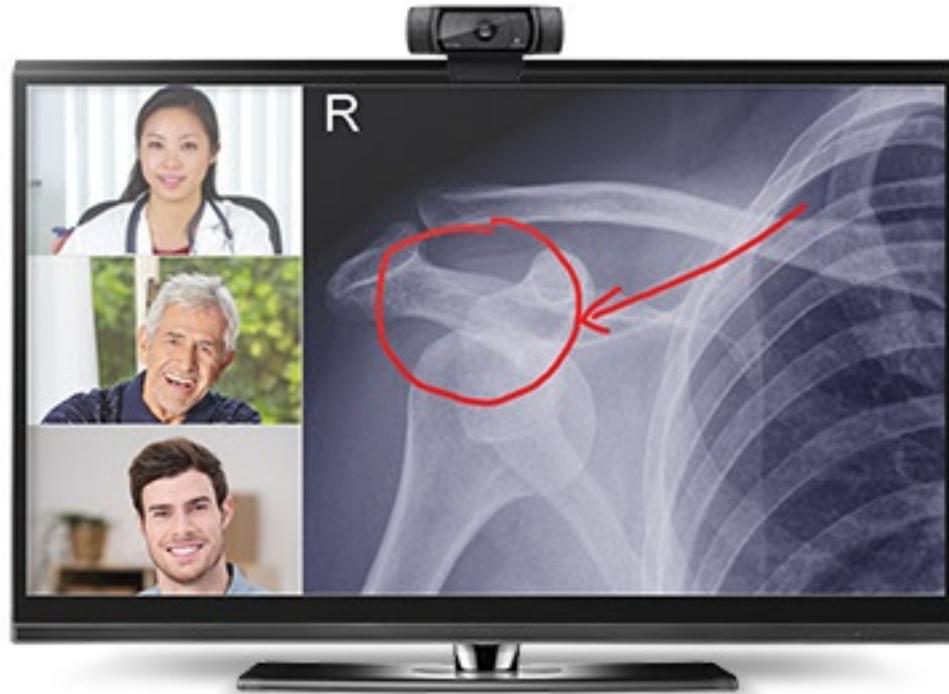

Don't limit telemedicine to expensive videoconference rooms or complicated hardware. VSee's simple telehealth solutions let you quickly deploy any workflow as your services grow. Whether you need provider-to-provider or provider-to-patient video calls VSee meets all your needs: telestroke, pre-surgery consults, genetic counseling, post-op follow-up, medical interpretation, and more!

VSee also provides integrated hardware and software solutions as a value-added service. The ultralight **VSee Home Care Kit** was specially designed for traveling nurses for use with mobile devices. The **VSee Telemedicine Kit** is a doctor-in-a-box case enabling remote visits from anywhere. The **VSee Telemedicine Cart** is a favorite with physicians requiring minimal training with its simple PC interface.

Cont'd

Hospital Telemedicine

VSee Messenger

Directly see patients and their families in the home, e.g. pre-surgery consults, genetic counseling

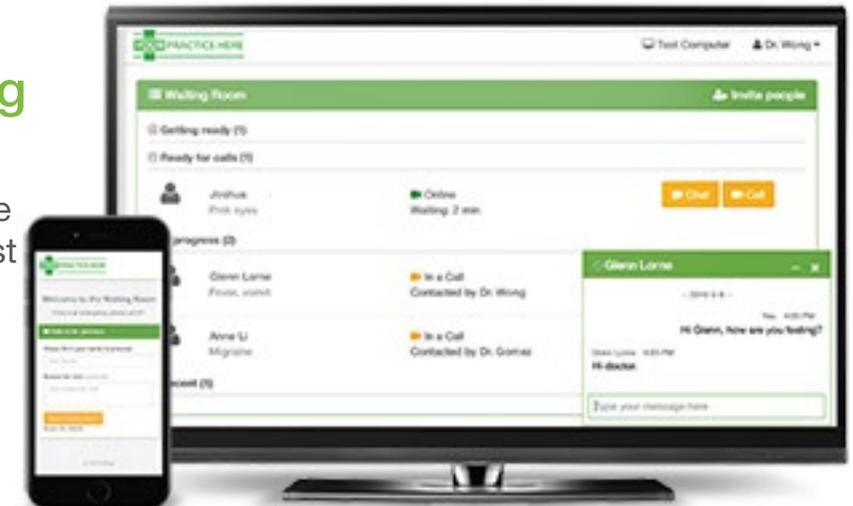

VSee Messenger

Add digital device streaming & remote PTZ control for remote specialist examinations and multiple view setups, e.g. tele-NICU, telestroke, burn, trauma/ER

VSee Clinic - Triage Waiting Room

Add a patient queue to manage specialist consults

Behavioral Health, Psychiatry, Addiction Recovery

Seeing a client's facial expressions and gestures is vital for behavioral health specialists. That's why secure, reliable video is key to providing online care..

The **VSee Messenger** is the only solution most providers will need. This simple, HIPAA-compliant video chat is available on all major platforms (iPhone, iPad, Android devices, PC, and Mac). Additional capabilities include text chat with picture-send, document-share with live annotation, and file-transfer. (Group video calls may be limited to three to seven callers depending on user networks.)

Group facilities or therapists who want an extra layer of privacy can add a **VSee Clinic - Triage Waiting Room**. This provides a custom weblink that can be emailed to clients or embedded into a website. Clients do not have to create a VSee account and are dropped into a private patient queue that is accessible to multiple providers.

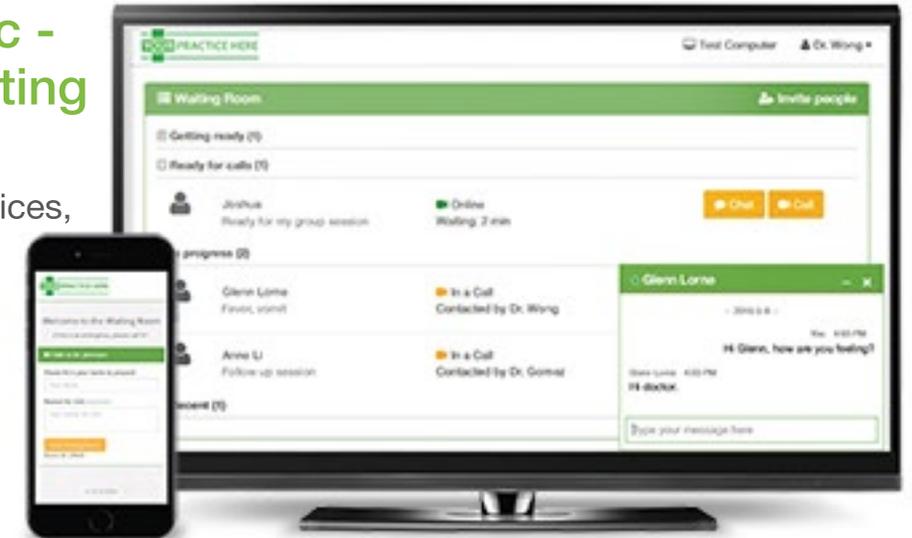

VSee Messenger

For solo therapists, psychiatrists, surgeons, and anyone just starting out

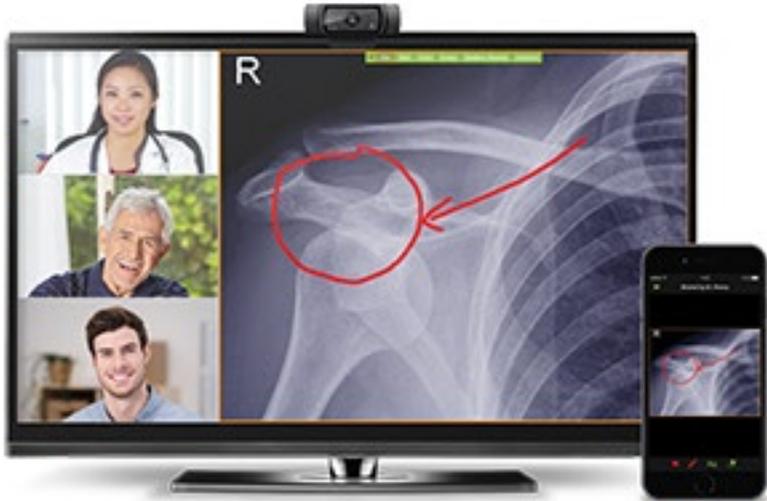

VSee Clinic - Triage Waiting Room

For group practices, solo therapists, prison therapy, rehabilitation facilities

Video Telehealth Solutions

VSee Messenger

Easily communicate PHI via text, screen-share, picture-share and HD video. Livestream medical device images and annotate shared lab tests, MRIs, etc.

VSee Clinic - Full Feature

A complete medical office suite for extending your practice online. Includes patient queuing, intake forms, scheduling, ePay, modular EMR, and more.

VSee Clinic - Triage Waiting Room

The simplest way to start managing online visits with no register patient sign-in and queuing. Great for those with an existing EMR or practice management system.

VSee SDKs

Build your own mobile health app with our messenger and health device APIs. Or have our expert engineers build it for you fast.

Telehealth Hardware Solutions
